

# @11ty/posthtml-urls

PostHTML plugin for transforming URLs. This is a fork of [posthtml/posthtml-urls](https://github.com/11ty/posthtml-urls).

## Installation

[Node.js](https://nodejs.org/en/) >= 6 is required. To install, type this at the command line:

```
npm install @11ty/posthtml-urls
```

## Usage

```
const posthtml = require('posthtml');
const urls = require('@11ty/posthtml-urls');

const options = {
  eachURL: (url, attr, tagName) =>
    `http://domain.com/${url}`
};

posthtml()
  .use( urls(options) )
```

```
.process('a href="link.html">link</a>')  
  .then(result =>  
    console.log(result.html));  
  // -> a href="http://domain.com/  
    link.html">link</a>
```

## Options

eachURL

Type: Function Default value: undefined A callback function ran for each URL value found. You can return either a synchronous value or a Promise.

filter

Type: Object Default value: `{...}` The elements and attributes for which to search. An attribute value can optionally be a function, for deeper filtering.

## FAQ

- How can I filter `<style>` elements and style attributes? Use [posthtml-postcss](#) and [postcss-url](#).
