

# array-uniq build unknown

*Create an array without duplicates*

It's already pretty fast, but will be much faster when [Set](#) becomes available in V8 (especially with large arrays).

## Install

```
$ npm install --save array-uniq
```

## Usage

```
const arrayUniq = require('array-uniq');  
  
arrayUniq([1, 1, 2, 3, 3]);  
//=> [1, 2, 3]  
  
arrayUniq(['foo', 'foo', 'bar', 'foo']);  
//=> ['foo', 'bar']
```
