

Pascal Case

Transform into a string of capitalized words without separators.

Installation

```
npm install pascal-case --save
```

Usage

The function also accepts [options](#).

Merge Numbers

If you'd like to remove the behavior prefixing `_` before numbers, you can use `pascalCaseTransformMerge`:

```
import { pascalCaseTransformMerge }  
    from "pascal-case";  
  
pascalCase("version 12", { transform:  
    pascalCaseTransformMerge }); //  
=> "Version12"
```
