

## Plugins

See the [official docs on plugins](#).

A simpler static site generator. An alternative to Jekyll. Written in JavaScript. Transforms a directory of templates (of varying types) into HTML. Works with HTML, Markdown, JavaScript, Liquid, Nunjucks, with addons for WebC, Sass, Vue, Svelte, TypeScript, JSX, and many others!

## ➡ Documentation

- Please star [this repo on GitHub!](#)

## Installation

```
npm install @11ty/eleventy --save-dev
```

Read our [Getting Started guide](#).

## Tests

npm run test

- We use the [ava](#) [JavaScript test runner](#) ([Assertions documentation](#))
-  To keep tests fast, thou shalt try to avoid writing files in tests.
