```
    { "name": "Snake" },
  { "name": "!", --context
npx liquidjs --template Hello,
```

Or render directly from CLI using npx:

```
<script src="https://cdn.jsdelivr.net/
npm/liquidjs/dist/
liquid.browser.min.js"></script>
```

Or use the UMD bundle from jsDeliver:

npm install liquidjs

Install from npm in Node.js:

Installation

Liquid syntax.

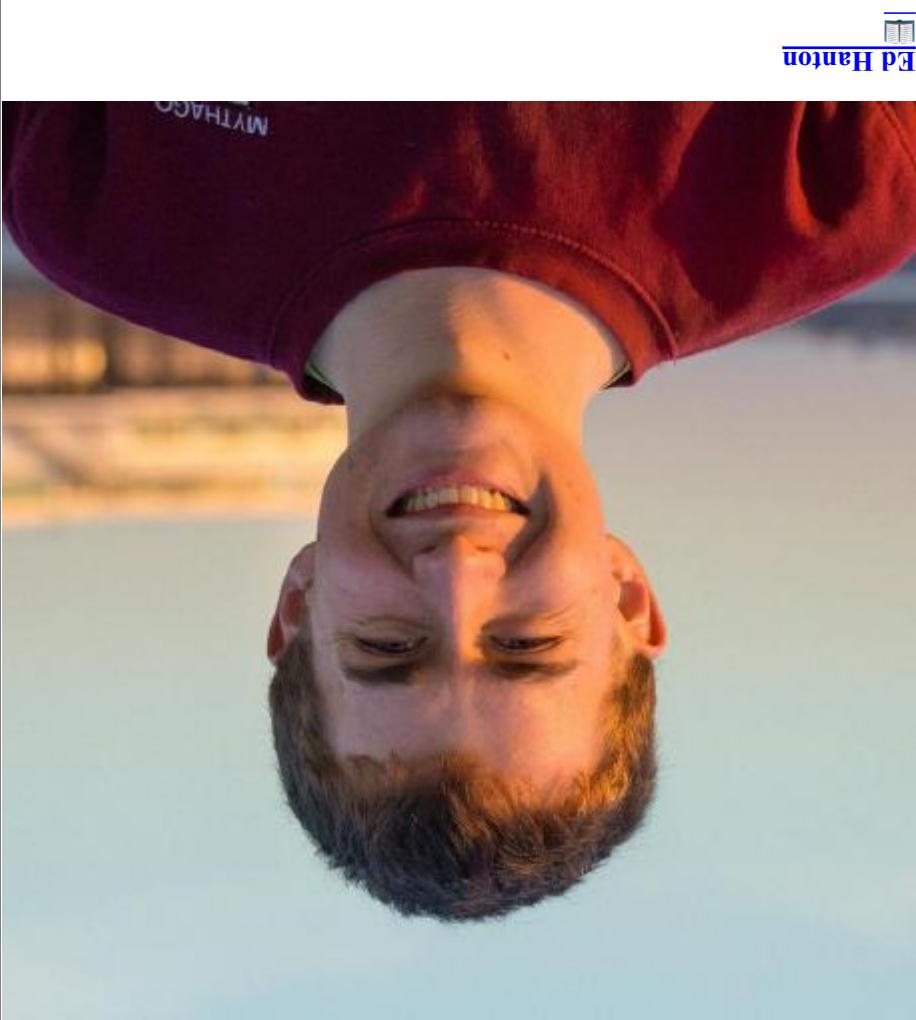

A live demo is also available and here's a [quick tutorial](#) for

```
{ "username": "LiquidJS" } | capitalize {} } , welcome to
```

looks like:

Basically there're two types of Liquid syntax: tags enclosed by
and outputs enclosed by {{ }}. A Liquid template

What's it like?

[Tim van Dam](#)

For more details, refer to the [Setup Guide](#).

Who's Using LiquidJS?

- [Eleventy](#): Eleventy, a simpler static site generator.
- [Github Docs](#): The open-source repo for docs.github.com.
- [Opensense](#): The smarter way to send email.
- [Directus](#): an instant REST+GraphQL API and intuitive no-code data collaboration app for any SQL database.
- [Semgrep](#): Lightweight static analysis for many languages.
- [Rock](#): An open source CMS, Relationship Management System (RMS) and Church Management System (ChCMS) all rolled into one.
- [Mitosis](#): Write components once, run everywhere. Compiles to React, Vue, Qwik, Solid, Angular, Svelte, and more.
- [Pattern Lab](#): a frontend workshop environment that helps you build, view, test, and showcase your design system's UI components.
- [Builder.io](#): the first and only headless CMS with a visual editor that lets you drag and drop with your components, directly within your current site or app. Completely API-driven, for cleaner code and simpler workflows.
- [Microsoft Power Pages](#): a secure, enterprise-grade, low-code software as a service (SaaS) platform for creating, hosting, and administering modern external-facing business websites.

[Sponsors](#). Special thanks to our sponsors!

If you personally love LiquidJS or it's benefiting your business, please consider financially support us via [GitHub](#)

Financial Support

this list!

Feel free to create a PR or contact me to add your use case into webhooks.

- [WISMOlabs](#): Post Purchase Experience platform for eCommerce retailers enhancing customer satisfaction by using LiquidJS to provide customizable post-purchase experiences through programmable email, SMS, order tracking pages, and webhooks.

generated, fully customizable website with the documentation of your APIs.

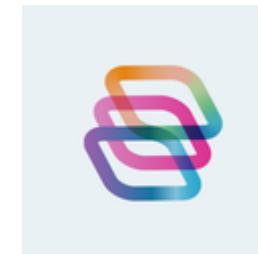

- [Azure API Management developer portal](#): an automatically
