

Personal Website (11ty + Markdown)

This is a static website built with [Eleventy \(11ty\)](#).

All posts are written in Markdown and rendered into HTML using layouts and collections.

🚀 Development

Requirements

- [Node.js](#) (v18+ recommended)
- npm (comes with Node)

Install dependencies

```
npm install
```

1

2

8

7

1. Your content goes here. Write in Markdown!
2. (Optional) Add images in the same folder: 2025/09/07/assets/my-photo.png
3. (Optional) Add images in the same folder: ![Alt text](assets/my-photo.png) and reference it with: `and reference it with:`

Posts are automatically picked up in `collections.posts` and sorted newest → oldest.

Category filters (`deutsch`, `espanol`) depend on the `metadata.categories` front matter.

🌐 Styling

- Main stylesheet: `assets/style.css`
- Linked from `base.njk`:

6

```
<link rel="stylesheet" href="/assets/style.css">
```

- Global theme variables are defined in `:root` inside CSS.

🌐 Special Pages

- **Home (/)**: Shows featured + recent posts + latest German/Spanish post.
- **Deutsch (/deutsch/)**: Lists posts tagged with `kurzgeschichten`.

10

15

New Post

Addding Content

```
title: My New Article
date: 2025-09-07T10:00:00.000Z
metaData:
  featuredImage: assets/my-photo.png
  title: My New Article
tags:
  - ai
  - fiction
  - kurzgeschichten
categories:
  - category1
  - category2
```

Run locally

Start a dev server with live reload:

```
npx @11ty/eleventy --serve
```

The site will be available at:

👉 <http://localhost:8081/>

💡 Happy writing!

- Use Google Fonts by editing `assets/base.css`.
- Add new navigation links in `_includes/_nav.njk`.
