

# **evaluate-value**

*Return a value or an evaluated function (with arguments).*

When the first input argument is a function, it is executed with the remaining arguments, and the result is returned.

When the first input argument is *not* a function, it is simply returned.

## **Installation**

[Node.js](#) >= 8 is required. To install, type this at the command line:

```
npm install evaluate-value
```

## **Usage**

```
//-> true  
evaluateValue(() => true);
```

```
//-> true  
evaluateValue((arg1, arg2) => arg1 === arg2,  
true,  
false  
);
```
