array-differ `build unknown`

Create an array with values that are present in the first input array but not additional ones

Install

```
$ npm install --save array-differ
```

Usage

```
var arrayDiffer = require('array-differ');

arrayDiffer([2, 3, 4], [3, 50]);
//=> [2, 4]
```

API

arrayDiffer(input, values, [values, …])

Returns the new array.

input
