Camel Case

Transform into a string with the separator denoted by the next word capitalized.

Installation

```
npm install camel-case --save
```

Usage

The function also accepts options.

Merge Numbers

If you'd like to remove the behavior prefixing _ before numbers, you can use camelCaseTransformMerge:

```
import { camelCaseTransformMerge } from
    "camel-case";

camelCase("version 12", { transform:
    camelCaseTransformMerge }); //=>
    "version12"
```
