Nunjucks

Nunjucks is a full featured templating engine for javascript. It is heavily inspired by jinja2. View the docs here.

Installation

```
npm install nunjucks
```
To use the file watcher built-in to Nunjucks, Chokidar must be installed separately.
```
npm install nunjucks chokidar
```
(View the CHANGELOG)

Documentation

See here.

Browser Support

Supported in all modern browsers. For IE8 support, use es5-shim.

Tests

Run the tests with npm test.
Watch master branch's tests running in the browser.
