

	eleventy-dev-server🕒⚡🔴🐼 A minimal, modern, generic, hot-reloading local web server to help web developers. ➡ Documentation - Please star Eleventy on GitHub! - Follow us on Twitter @eleven_ty - Support 11ty on Open Collective 11ty on npm 11ty on GitHub	NPM V2.0.8	Installation This is bundled with @11ty/eleventy (and you do not need to install it separately) in Eleventy v2.0. CLI Eleventy Dev Server now also includes a CLI. The CLI is for standalone (non-Eleventy) use only: separate installation is unnecessary if you're using this server with @11ty/eleventy.
8	7 - v2.0.0 bumps Node.js minimum to 18. - We use the ava JavaScript test runner (Assertions documentation) Tests npm run test	9 # Serve a different subdirectory (also aliased as --input) npx @11ty/eleventy-dev-server --dir=site # Disable the 'domdiff' feature npx @11ty/eleventy-dev-server --domdiff=false # Full command list in the Help npx @11ty/eleventy-dev-server --help	5 npm install -g @11ty/eleventy-dev-server # Alternatively, install locally into your project npm install @11ty/eleventy-dev-server This package requires Node 18 or newer. CLI Usage # Serve the current directory npx @11ty/eleventy-dev-server
