

balanced-match

Match balanced string pairs, like { and } or and . Supports regular expressions as well!

build status

testling badge

Example

Get the first matching pair of braces:

```
var balanced = require('balanced-match');
```

```
console.log(balanced('{', '}',  
                    'pre{in{nested}}post'));
```

```
console.log(balanced('{', '}',
    'pre{first}between{second}
    post'));
console.log(balanced(/\s+\s+/, /\s+
\s+/, 'pre
    {   in{nest}   }   post'));
```

The matches are:

```
$ node example.js
{ start: 3, end: 14, pre: 'pre',
  body: 'in{nested}', post:
    'post' }
```

```
{ start: 3,
  end: 9,
  pre: 'pre',
  body: 'first',
  post: 'between{second}post' }
{ start: 3, end: 17, pre: 'pre',
  body: 'in{nest}', post:
    'post' }
```

To report a security vulnerability, please use the [Tidelift security contact](#). Tidelift will coordinate the fix and disclosure.

Security contact information

```
npm install balanced-match
```

With $\overline{wpm}$ do:

Installation

For the first non-nested matching pair of a and b in str, return an array with indices: [< a index>, < b index>].

If there's no match, undefined will be returned.

If the str contains more a than b / there are unmatched pairs, the first match that was closed will be used. For example, { { a } will match [1, 3] and { a } will match [0, 2].

```
var r = balanced.range(a, b, str)
```

[illegible]

- **start** the index of the first match of a
- **end** the index of the matching b
- **pre** the prematch, a and b not included
- **post** the postmatch, a and b not included

API

```
var m = balanced(a, b, str)
```
