```
// {x,y}[,incr}]
// -\z\p+\,\.-,\z\p+(\,\.-,\z\p)+\z\p}

A numeric sequence from x to y inclusive,
with optional increment. If x or y start with a
leading 0, all the numbers will be padded to
have equal length. Negative numbers and
backwards iteration work too.
```

An alphabetic sequence from x to y inclusive, with optional increment. x and y must be exactly one character, and if given, incr must be a number.

For compatibility reasons, the string `#{` is not eligible for brace expansion.
