

<u>5.3.3 / 2023-11-30</u> Fixed issue #1262 - dynamically require os for edge runtime compatibility.	<u>5.3.2 / 2023-01-19</u> - Fixed issue #1224 - incorrect parsing of selectors with double hyphen. - Fixed issue #1228 - incorrect appending of '%' inside rgba colors. - Fixed issue #1232 - support for @container keyword. - Fixed issue #1239 - edge case in handling @import statements.	Fixed issue #1242 - support for @layer keyword.	<u>5.3.1 / 2022-07-13</u> - Fixed issue #1218 - double hyphen in at-rule breaks parsing. - Fixed issue #1220 - adds optimization for nth-* rules.
1	2	3	4
8	7	9	5
<u>5.2.3 / 2022-01-26</u> - Fixed issue #1185 - Keeping comments inside variables. - Fixed issue #1194 - unexpected end of JSON input when source map is empty.	<u>5.2.4 / 2022-01-28</u> Fixed issue #1196 - correctly parse variables & comments mix.	- Fixed issue #1208 - handling generic family names. - Fixed issue #1210 - handling file:/// protocol.	<u>5.3.0 / 2022-03-31</u> - Adds customizable value optimizers for variables. - Fixed issue #1159 - adds optimization for nth-child and nth-of-type. - Fixed issue #1181 - CSS level 4 color functions with spaces. - Fixed issue #1183 - fraction optimizer breaks image-set.
<u>5.2.2 / 2021-10-21</u> Fixed an unsafe data URI regex, which, when clean-css is used as a service, could be used in a DOS attack.	<u>5.2.1 / 2021-09-30</u> Fixed issue #1186 - bad error handling in batch mode with promises.	<u>5.2.0 / 2021-09-25</u> Fixed issue #1180 - properly handle empty variable values.	<u>5.1.5 / 2021-08-05</u> Fixed issue #1178 - fixes lack of space removal in variable blocks.
6	10	11	12
16	15	14	13
<u>5.1.1 / 2021-03-03</u> Fixed issue #1156 - invalid hsl/hsia validation in level 2 optimizations.	<u>5.1.2 / 2021-03-19</u> Fixed issue #996 - space removed from pseudo classes.	<u>5.1.3 / 2021-06-25</u> - Fixed issue #1160 - keep zero units when inside multiple functions. - Fixed issue #1161 - extra whitespace in URLs. - Fixed issue #1166 - incorrect component splitting when empty multiplex part.	<u>5.1.4 / 2021-07-29</u> Fixed issue #1177 - fix to missing local imports when only remote ones allowed.

5.1.0 / 2021-02-18 - Fixes stripping '%' from inside color functions. - Improves tokenization speed by ~30%. - Fixed issue #1143 - some missing level 1 value optimizations. 17	5.0.1 / 2021-01-29 Fixed issue #1139 - overriding & merging properties without canOverride set. 81	5.0.0 / 2021-01-29 - Adds a way process input files without bundling it into one big output file. - Adds level 1 and level 2 optimization plugins. - Disables URL rebasing by default. - Disables URL unquoting by default. - Drops support for Node.js 6 & 8 to support last 3 Node.js releases: 10, 12, and 14. 69	- Fixed issue #889 - whitelisted level 1 optimizations. - Fixed issue #975 - incorrect block name optimization. - Fixed issue #1009 - whitespace around comments. - Fixed issue #1021 - allow one- and two-letter property names. - Fixed issue #1022 - merging into shorthands new property positioning. - Fixed issue #1032 - wrong order of merged shorthands with inherit. 20
24 - Fixed issue #1125 - quotes stripped from within @supports clause. - Fixed issue #1128 - take variables into account when reordering properties. - Fixed issue #1132 - vendor-prefixed classes inside :not(). - Reworks all level 1 optimizations to conform to plugin style.	23 - Fixed issue #1088 - building source maps with source preserved via comments. - Fixed issue #1090 - edge case in merging for border and border-image. - Fixed issue #1103 - don't allow merging longhand into unset shorthand. - Fixed issue #1115 - incorrect multiplex longhand into shorthand merging. - Fixed issue #1117 - don't change zero values inside min, max, and clamp functions. - Fixed issue #1122 - don't wrap data URI in single quotes.	22 - Fixed issue #1059 - animation time units as CSS expressions. - Fixed issue #1060 - variable removed when shorthand's only value. - Fixed issue #1062 - wrong optimization of CSS pseudo-classes with selector list. - Fixed issue #1073 - adds support for non-standard rpx units. - Fixed issue #1075 - media merging and variables. - Fixed issue #1087 - allow units with any case.	21 - Fixed issue #1043 - calc fallback removed within other function. - Fixed issue #1045 - non-standard protocol-less URL first slash removed. - Fixed issue #1050 - correctly keeps default animation duration if delay is also set. - Fixed issue #1053 - treats calc() as first class width value. - Fixed issue #1055 - supports 4- and 8-character hex with alpha color notation. - Fixed issue #1057 - level 2 optimizations and quoted font family name.
4.2.3 / 2020-01-28 Fixed issue #1106 - regression in handling RGBA/HSLA colors. 25	4.2.2 / 2020-01-25 - Fixed error when property block has no value. - Fixed issue #1077 - local fonts with color in name. - Fixed issue #1082 - correctly convert colors if alpha >= 1. - Fixed issue #1085 - prevent unquoting of grid elements. 26	4.2.1 / 2018-08-07 Fixes giving breakWith option via a string. 27	4.2.0 / 2018-08-02 - Adds process method for compatibility with optimize-css-assets-webpack-plugin. - Fixed issue #861 - new transition property optimizer. - Fixed issue #895 - ignoring specific styles. - Fixed issue #947 - selector based filtering. - Fixed issue #964 - adds configurable line breaks. 88
32 Fixed issue #1008 - edge case in breaking up font shorthand.	31 - Fixed issue #988 - edge case in dropping default animation-duration. - Fixed issue #989 - edge case in removing unused at rules. - Fixed issue #1001 - corrupted tokenizer state. - Fixed issue #1006 - edge case in handling invalid source maps. 4.1.10 / 2018-03-05	30 Backports fixes to ReDOS vulnerabilities in validator code. 4.1.11 / 2018-03-06	29 - Fixed issue #986 - level 2 optimizations and CSS 4 colors. - Fixed issue #1000 - carriage return handling in tokenizer. - Fixed issue #1038 - font-variation settings quoting. - Fixes ReDOS vulnerabilities in validator code.

<u>4.1.9 / 2017-09-19</u> Fixed issue #971 - edge case in removing unused at rules.	<u>4.1.8 / 2017-09-02</u> - Fixed issue #959 - regression in shortening long hex values. - Fixed issue #960 - better explanation of efficiency stat. - Fixed issue #965 - edge case in parsing comment endings. - Fixed issue #966 - remote @imports referenced from local ones.	<u>4.1.7 / 2017-07-14</u> Fixed issue #957 - 0% minification of width property.	<u>4.1.6 / 2017-07-08</u> - Fixed issue #887 - edge case in serializing comments. - Fixed issue #953 - beautify breaks attribute selectors.
33	34	35	36
40	39	38	37
<u>4.1.2 / 2017-05-10</u> - Fixed issue #939 - semicolon after @apply at rule. - Fixed issue #940 - handling more font keywords. - Fixed issue #941 - breaking up vendor prefixed animation.	<u>4.1.3 / 2017-05-18</u> Fixed issue #946 - tokenizing - ms-grid-columns repeat syntax.	<u>4.1.4 / 2017-06-14</u> Fixed issue #950 - bug in removing unused @font-face rules.	<u>4.1.5 / 2017-06-29</u> - Fixed issue #945 - hex RGBA colors in IE filters. - Fixed issue #952 - parsing @page according to CSS3 spec.
<u>4.1.1 / 2017-05-08</u> Fixed issue #938 - removing unused at-rules with !important.	<u>4.1.0 / 2017-05-07</u> - Improves longhand-into-shorthand merging mechanism in complex cases as with border-* shorthands. - Fixed issue #254 - adds font property optimizer. - Fixed issue #525 - restores inherit-based merging. - Fixed issue #755 - adds custom handling of remote requests.	- Fixed issue #860 - adds animation property optimizer. - Fixed issue #862 - allows removing unused at rules. - Fixed issue #886 - better multi pseudo class / element merging. - Fixed issue #890 - adds toggle to disable empty tokens removal. - Fixed issue #893 - inline: false as alias to inline: 'none'. - Fixed issue #905 - allows disabling selector sorting.	- Fixed issue #906 - improves usability of web UI settings. - Fixed issue #908 - improved minify method signature. - Fixed issue #916 - maximum number of merged selectors. - Fixed issue #920 - allows skipping certain properties in level 2 optimizations. - Fixed issue #934 - smarter longhand into shorthand merging.
41	42	43	44
48	47	46	45
<u>4.0.10 / 2017-03-22</u> - Fixed issue #917 - prevents grid area unquoting. - Backported #916 - maximum number of merged selectors. - Refixed issue #556 - IE backslash hacks.	<u>4.0.11 / 2017-04-04</u> Fixed issue #924 - hsl zero percent eager optimization.	<u>4.0.12 / 2017-04-12</u> Fixed issue #930 - regression in tidying selectors.	<u>4.0.13 / 2017-05-10</u> Backports #939 - semicolon after @apply at rule.

<u>4.0.9 / 2017-03-15</u> - Fixed issue #902 - case insensitive attribute matchers. - Fixed issue #903 - web UI and source maps. - Fixed issue #907 - space after closing brace in @supports. - Fixed issue #910 - too aggressive precision optimizations. 49	<u>4.0.8 / 2017-02-22</u> - Fixes edge case in remote stylesheet fetching. - Fixed issue #899 - regression in optimizing pseudo class arguments. 50	<u>4.0.7 / 2017-02-14</u> Fixed issue #891 - merging vendor-prefixed pseudo-classes. 51	<u>4.0.6 / 2017-02-10</u> Fixed issue #885 - unquoting font-feature-settings. 52
55 Fixed issue #874 - regression in at-rule tokenization. <u>4.0.2 / 2017-01-26</u>	55 Fixed issue #875 - invalid traversing in semantic merging. <u>4.0.3 / 2017-01-30</u>	54 - Fixed issue #879 - incorrect handling of spaces in paths. - Fixed issue #878 - invalid double backslash tokenization. <u>4.0.4 / 2017-02-04</u>	53 - Fixed issue #884 - handling absolute paths on Windows. - Fixed issue #881 - incorrect require arity. - Fixed issue #880 - incorrect token type identification. <u>4.0.5 / 2017-02-07</u>
<u>4.0.1 / 2017-01-25</u> - Fixed issue #866 - edge case in inline option. - Fixed issue #867 - skip optimizing variable values. - Fixed issue #868 - accept absolute paths in input hash. - Fixed issue #872 - edge case in CSS tokenization. 57	<u>4.0.0 / 2017-01-23</u> - Adds more detailed error & warning messages on top of the new tokenizer. - Disables restructuring optimizations by default until optimized in #533. - Fixes a bug ignoring incorrect properties in complex restructuring. - Requires Node.js 4.0+ to run. - Removes benchmark API option as total time is always reported under stats property. 58	- Removes debug API switch as stats are always gathered and available under stats property. - Replaces the old tokenizer with a new one which doesn't use any escaping. - Replaces the old @import inlining with one on top of the new tokenizer. - Re-enables background-(clip origin size) merging with background shorthand. - Simplifies URL rebasing with a single rebaseTo option in API or inferred from --output in CLI. 59	- Splits inliner option into inlineRequest and inlineTimeout. - Fixed issue #209 - adds output formatting via format flag. - Fixed issue #290 - removes aggressive merging. - Fixed issue #432 - adds URLs normalization. - Fixed issue #460 - unescaped semicolon in selector. - Fixed issue #657 - adds property name validation. 60
64 - Fixed issue #829 - adds more strict selector merging rules. - Fixed issue #834 - adds extra line break in nested blocks. - Fixed issue #836 - enables level 0 optimizations. - Fixed issue #839 - allows URLs in import inlining rules. - Fixed issue #840 - allows input source map as map object. - Fixed issue #843 - regression in selector handling.	63 - Fixed issue #796 - semantic merging for @media blocks. - Fixed issue #801 - smarter @import inlining. - Fixed issue #806 - skip optimizing variable properties. - Fixed issue #817 - makes of disable rounding. - Fixed issue #818 - disables px rounding by default. - Fixed issue #828 - chrome - hack support.	62 - Fixed issue #756 - adds disabling font-weight optimizations. - Fixed issue #758 - ignores rules with empty selector. - Fixed issue #767 - disables remote @import inlining by default. - Fixed issue #773 - adds reordering based on selector specificity. - Fixed issue #785 - adds @font-face deduplication. - Fixed issue #791 - resolves imports in-memory if possible.	61 - Fixed issue #685 - adds lowering hex colors optimization. - Fixed issue #686 - adds rounding precision for all units. - Fixed issue #703 - changes default IE compatibility to 10+. - Fixed issue #731 - adds granular control over level 2 optimizations. - Fixed issue #739 - error when a closing brace is missing. - Fixed issue #750 - allows width overriding.

- Fixed issue #845 - web compatibility of 4.0 branch. - Fixed issue #847 - regression in handling invalid selectors. - Fixed issue #849 - disables inlining protocol-less resources. - Fixed issue #856 - allows minify to return a promise. - Fixed issue #857 - normalizes CleanCSS API interface. - Fixed issue #863 - adds transform callback for custom optimizations.	3.4.26 / 2017-05-10 Backports #939 - semicolon after @apply at-rule.	3.4.25 / 2017-02-22 Fixed issue #897 - tokenization with escaped markers.	3.4.24 / 2017-01-20 Fixed issue #859 - avoid -webkit-border-radius optimizations.
65	66	67	68
72	71	70	69
3.4.20 / 2016-09-26 Fixed issue #814 - :selection rule merging.	3.4.21 / 2016-11-16 - Fixed issue #821 - reducing non-adjacent rules. - Fixed issue #830 - reordering border-* properties. - Fixed issue #833 - moving @media queries.	3.4.22 / 2016-12-12 - Fixed issue #841 - disabled importing and files passed as array. - Ignores @import at-rules if appearing after any non-@import rules.	3.4.23 / 2016-12-17 Fixed issue #844 - regression in property values extraction.
3.4.19 / 2016-07-25 Fixed issue #795 - !important and override compacting.	3.4.18 / 2016-06-15 Fixed issue #787 - regression in processing data URIs.	3.4.17 / 2016-06-04 Fixed issue #783 - regression in processing data URIs.	3.4.16 / 2016-06-02 - Fixed issue #781 - regression in override compacting. - Fixed issue #782 - regression in processing data URIs.
73	74	75	76
80	79	78	77
3.4.12 / 2016-04-09 - Fixed issue #734 - --root option edge case. - Fixed issue #758 - treats empty rule as unmergeable.	3.4.13 / 2016-05-23 Fixed issue #734 - Node.js 6.x support.	3.4.14 / 2016-05-31 - Fixed issue #751 - stringifying CSS variables. - Fixed issue #763 - data URI SVG and quoting. - Fixed issue #765 - two values of border-radius. - Fixed issue #768 - invalid border-radius property.	3.4.15 / 2016-06-01 - Fixed issue #776 - edge case in quoted data URIs. - Fixed issue #779 - merging background- (position).size). - Fixed issue #780 - space after inlined variables.

<u>3.4.11 / 2016-04-01</u> - Fixed issue #738 - edge case in comment processing. - Fixed issue #741 - HTTP proxy with HTTPS inlining. - Fixed issue #743 - background shorthand and source maps. - Fixed issue #745 - matching mixed case ! important. 81	<u>3.4.10 / 2016-02-29</u> Fixed issue #735 - whitespace removal with escaped chars. 82	<u>3.4.9 / 2016-01-03</u> - Sped up merging by body advanced optimization. - Fixed issue #693 - restructuring edge case. - Fixed issue #711 - border fuzzy matching. - Fixed issue #714 - stringifying property level at rules. - Fixed issue #715 - stack too deep in comment scan. 83	<u>3.4.8 / 2015-11-13</u> Fixed issue #676 - fuzzy matching unquoted data URIs. 84
88 - Fixed issue #626 - edge case in import rebasing. - Fixed issue #674 - adjacent merging order. <u>3.4.4 / 2015-09-21</u>	87 - Fixed issue #681 - property inheritance & restructuring. - Fixed issue #675 - overriding with ! important. <u>3.4.5 / 2015-09-28</u>	86 Fixed issue #679 - wrong rebasing of remote URLs. <u>3.4.6 / 2015-10-14</u>	85 - Fixed issue #692 - edge case in URL quoting. - Fixed issue #695 - shorthand overriding edge case. - Fixed issue #699 - IE9 transparent hack. - Fixed issue #701 - url quoting with hash arguments. <u>3.4.7 / 2015-11-10</u>
<u>3.4.3 / 2015-09-15</u> - Fixed issue #668 - node v4 path.join. - Fixed issue #669 - adjacent overriding with !important. 89	<u>3.4.2 / 2015-09-14</u> - Fixed issue #598 - restructuring border properties. - Fixed issue #654 - disables length optimizations. - Fixed issue #655 - shorthands override merging. - Fixed issue #660 - !important token overriding. 90	- Fixed issue #662 - !important selector reducing. - Fixed issue #667 - rebasing remote URLs. 16	<u>3.4.1 / 2015-08-27</u> Fixed issue #652 - order of restoring and removing tokens. 92
96 Fixed issue #648 - adds property level at-rule support.	95 - Fixed issue #618 - adds safer function validation. - Fixed issue #625 - adds length unit optimizations. - Fixed issue #632 - adds disabling remote imports. - Fixed issue #635 - adds safer 0% optimizations. - Fixed issue #644 - adds time unit optimizations. - Fixed issue #645 - adds bottom to top media merging.	94 - Adds testing source maps in batch mode. - Unifies wrappers for simple & advanced optimizations. - Fixed issue #596 - support for !ie IE<8 hack. - Fixed issue #599 - support for inlined source maps. - Fixed issue #607 - adds better rule reordering. - Fixed issue #612 - adds HTTP proxy support.	93 - Adds an option for a fine-grained @import control. - Adds unit compatibility switches to disable length optimizations. - Adds inerring proxy settings from HTTP_PROXY environment variable. - Adds support for Polymer / Web Components special selectors. - Adds support for Polymer mixins. <u>3.4.0 / 2015-08-27</u>

3.3.10 / 2015-08-27 - Adds better comments + keepBreaks handling. - Adds better text normalizing in source maps mode. - Fixes non-adjacent optimizations for source maps. - Fixes removing unused items. - Improves outline break up with source maps. 97	3.3.9 / 2015-08-09 Fixed issue #640 - URI processing regression. 99	3.3.8 / 2015-08-06 - Fixed issue #629 - source maps & background shorthands. - Fixed issue #630 - vendor prefixed flex optimizations. - Fixed issue #633 - handling data URI with brackets. - Fixed issue #634 - merging :placeholder selectors. 100	3.3.7 / 2015-07-29 Fixed issue #616 - ordering in restructuring. 101
3.3.6 / 2015-07-14 Fixed issue #620 - bold style in font shorthands. 102	3.3.5 / 2015-07-01 Fixed issue #608 - custom URI protocols handling. 103	3.3.4 / 2015-06-24 - Fixed issue #610 - border: inherit restoring. - Fixed issue #611 - edge case in quote stripping. 104	3.3.3 / 2015-06-16 Fixed issue #603 - IE suffix hack defaults to on. 105
3.3.2 / 2015-06-14 - Fixed issue #595 - more relaxed block matching. - Fixed issue #601 - percentage minifying inside flex. - Fixed issue #602 - backslash IE hacks after a space. 106	3.3.1 / 2015-06-02 Fixed issue #590 - edge case in @import processing. 107	3.3.0 / 2015-05-31 - Cleans up url rebase code getting rid of unnecessary state. - Cleans up tokenizer code getting rid of unnecessary state. - Moves source maps tracker into lib/source-maps/track. - Moves tokenizer code into lib/tokenizer. - Moves URL scanner into lib/urls/reduce (was named incorrectly before). 108	3.2.11 / 2015-05-31 - Fixed issue #563 - background: inherit restoring. - Fixed issue #582 - overriding with prefixed values. - Fixed issue #583 - URL quoting for SVG data. - Fixed issue #587 - too aggressive border reordering. 112
3.2.11 / 2015-05-31 - Fixed issue #579 - background-origin into shorthand. - Fixed issue #580 - mixed @import processing. - Fixed issue #582 - overriding with prefixed values. - Fixed issue #583 - URL quoting for SVG data. - Fixed issue #587 - too aggressive border reordering. 111	3.2.11 / 2015-05-31 - Fixed issue #562 - optimizing invalid color values. - Fixed issue #563 - background: inherit restoring. - Fixed issue #570 - rebasing "no-ur1()" imports. - Fixed issue #574 - rewriting internal URLs. - Fixed issue #575 - missing directory as a target. - Fixed issue #577 - background-clip into shorthand. 110	3.2.11 / 2015-05-31 - Moves URL rebasing & rewriting into lib/urls. - Fixed issue #375 - unit compatibility switches. - Fixed issue #436 - refactors URI rewriting. - Fixed issue #448 - rebasing no protocol URIs. - Fixed issue #517 - turning off color optimizations. - Fixed issue #542 - space after closing brace in IE. 109	3.2.11 / 2015-05-31 - Fixed issue #563 - background: inherit restoring. - Fixed issue #582 - overriding with prefixed values. - Fixed issue #583 - URL quoting for SVG data. - Fixed issue #587 - too aggressive border reordering. 112

<u>3.2.10 / 2015-05-14</u> Fixed issue #572 - empty elements removal.	<u>3.2.9 / 2015-05-08</u> Fixed issue #567 - merging colors as functions.	<u>3.2.8 / 2015-05-04</u> Fixed issue #561 - restructuring special selectors.	<u>3.2.7 / 2015-05-03</u> - Fixed issue #551 - edge case in restructuring. - Fixed issue #553 - another style of SVG fallback. - Fixed issue #558 - units in same selector merging.
113 120 Fixed issue #541 - outline-style:auto in shorthand. <u>3.2.3 / 2015-04-22</u>	114 119 - Fixed issue #544 - regression in same value merging. - Fixed issue #546 - IE<11 calc() issue. <u>3.2.4 / 2015-04-24</u>	115 118 - Fixed issue #543 - better "comment in body" handling. - Fixed issue #548 - regression in font minifying. - Fixed issue #549 - special comments in source maps. <u>3.2.5 / 2015-04-25</u>	116 117 - Fixed issue #550 - proper contentSources tracking. - Fixed issue #556 - regression in IE backslash hacks. <u>3.2.6 / 2015-04-28</u>
<u>3.2.2 / 2015-04-21</u> Fixed issue #537 - regression in simple optimizer.	<u>3.2.1 / 2015-04-20</u> Fixed issue #534 - wrong @font-face stringifying.	<u>3.2.0 / 2015-04-19</u> - Bumps commander to 2.8.x. - Fixes remote asset rebasing when passing data as a hash. - Improves path resolution inside source maps. - Makes root option implicitly default to process.cwd(). - Fixed issue #371 - background fallback with none.	- Fixed issue #376 - option to disable <code>θ[unit]</code> -> <code>θ</code>. - Fixed issue #396 - better input source maps tracking. - Fixed issue #397 - support for source map sources. - Fixed issue #399 - support compacting with source maps. - Fixed issue #429 - unifies data tokenization. - Fixed issue #446 - list-style fuzzy matching.
121 128 Fixes issue #511 - () advanced processing. <u>3.1.9 / 2015-04-04</u>	122 127 Fixed issue #529 - wrong font weight minification.	123 126 - Fixed issue #507 - merging longhands into many shorthands. - Fixed issue #508 - removing duplicate media queries. - Fixed issue #521 - unit optimizations inside calc(). - Fixed issue #524 - timeouts in @import inlining. - Fixed issue #526 - shorthand overriding into a function. - Fixed issue #528 - better support for IE<9 hacks.	124 125 - Fixed issue #468 - bumps source-map to 0.4.x. - Fixed issue #480 - extracting uppercase property names. - Fixed issue #487 - source map paths under Windows. - Fixed issue #490 - vendor prefixed multivalue background. - Fixed issue #500 - merging duplicate adjacent properties. - Fixed issue #504 - keeping url() quotes.

<u>3.1.8 / 2015-03-17</u> - Fixes issue #498 - reordering and flexbox. - Fixes issue #499 - too aggressive - removal.	<u>3.1.7 / 2015-03-16</u> - Backports fix to #480 - reordering and uppercase properties. - Fixes issue #496 - space after bracket removal.	<u>3.1.6 / 2015-03-12</u> Fixes issue #489 - AlphaImageLoader IE filter.	<u>3.1.5 / 2015-03-06</u> Fixes issue #483 - property order in restructuring.
129	130	131	132
136	135	134	133
<u>3.1.1 / 2015-02-27</u> - Fixed issue #469 - extracting broken property. - Fixed issue #470 - negative padding removal. - Fixed issue #471 - correct order after restructuring.	<u>3.1.2 / 2015-03-01</u> - Refixed issue #471 - correct order after restructuring. - Fixes issue #466 - rebuilding background shorthand. - Fixes issue #462 - escaped apostrophes in selectors.	<u>3.1.3 / 2015-03-03</u> - Fixes issue #464 - data URI with quoted braces. - Fixes issue #475 - whitespace after closing brace.	<u>3.1.4 / 2015-03-04</u> - Fixes issue #472 - broken function minification. - Fixes issue #477 - @imports order in restructuring. - Fixes issue #478 - ultimate fix to brace whitespace.
<u>3.1.0 / 2015-02-26</u> - Adds 0deg to 0 minification where possible. - Adds better non-adjacent selector merging when body is the same. - Adds official support for node.js 0.12. - Adds official support for io.js 1.0. - Adds restructuring optimizations to reorganize selectors, which vastly improves minification.	- Fixed issue #158 - adds body-based selectors reduction. - Fixed issue #182 - removing space after closing brace. - Fixed issue #204 - @media merging. - Fixed issue #351 - remote @imports after content. - Fixed issue #357 - non-standard but valid URLs. - Fixed issue #416 - accepts hash as minify argument.	- Fixed issue #419 - multiple input source maps. - Fixed issue #435 - background-clip in shorthand. - Fixed issue #439 - background-origin in shorthand. - Fixed issue #442 - space before adjacent nav. - Fixed issue #445 - regression issue in url processor. - Fixed issue #449 - warns of missing close braces.	Fixed issue #463 - relative remote @import URLs.
137	138	139	140
144	143	142	141
<u>3.0.7 / 2015-01-22</u> Fixed issue #441 - hex to name color converting.	<u>3.0.8 / 2015-01-31</u> - Fixed issue #447 - background-color in shorthands. - Fixed issue #450 - name to hex color converting.	<u>3.0.9 / 2015-02-04</u> Fixed issue #452 - regression in advanced merging.	<u>3.0.10 / 2015-02-07</u> - Fixed issue #453 - double background-repeat. - Fixed issue #455 - property extracting regression.

3.0.6 / 2015-01-20 Refixed issue #414 - source maps position fallback. 145	3.0.5 / 2015-01-18 - Fixed issue #414 - source maps position fallback. - Fixed issue #433 - meging !important in shorthands. 146	3.0.4 / 2015-01-11 Fixed issue #314 - spaces inside calc. 147	3.0.3 / 2015-01-07 Just a version bump as npm incorrectly things 2.2.23 is the latest one. 148
152 - Allows target option to be a path to a folder instead of a file. - Allows disabling rounding precision. By @superlukas. - Breaks 2.x compatibility for using CleanCSS as a function. - Changes minify method output to handle multiple outputs. - Reworks minification to tokenize first then minify. See changes. - Removes support for node.js 0.8.x. - Renames noAdvanced option into advanced. 149	151 - Adds more granular control over compatibility settings. - Adds support for @counter-style at-rule. - Adds --source-map/sourceMap switch for building input's source map. - Adds --skip-shorthand-compacting/shorthandCompacting option for disabling shorthand compacting. 150	150 - Fixed issue #410 - advanced merging and comments. - Fixed issue #411 - properties and important comments. 149	149 Fixed issue #422 - handling calc as a unit. 148
153 - Renames noAggressiveMerging option into aggressiveMerging. - Renames noRebase option into rebase. - Speeds up advanced processing by shortening optimize loop. - Fixed issue #125 - source maps! - Fixed issue #344 - merging background-size into shorthand. - Fixed issue #352 - honors rebasing in imported stylesheets. - Fixed issue #360 - adds 7 extra CSS colors. - Fixed issue #363 - rem units overriding px. 152	154 - Fixed issue #373 - proper background shorthand merging. - Fixed issue #395 - unescaped brackets in data URIs. - Fixed issue #398 - restoring important comments. - Fixed issue #400 - API to accept an array of filenames. - Fixed issue #403 - tracking input files in source maps. - Fixed issue #404 - no state sharing in API. 153	155 - Fixed issue #405 - disables default background-size merging. - Refixed issue #304 - background-position merging. 154	156 2.2.22 / 2014-12-13 Backports fix to issue #304 - background-position merging. 155
160 Fixed issue #383 - rounding fractions once again. 159	159 Fixed issue #385 - edge cases in processing cut off data. 158	158 Backports fix to issue #390 - pseudo-class merging. 157	157 Backports fix to issue #373 - background shorthand merging. 156
2.2.18 / 2014-11-17	2.2.19 / 2014-11-20	2.2.20 / 2014-12-02	2.2.21 / 2014-12-10

<u>2.2.17 / 2014-11-09</u> Fixed issue #380 - rounding fractions to a whole number.	<u>2.2.16 / 2014-09-16</u> - Fixed issue #359 - handling escaped double backslash. - Fixed issue #358 - property merging in compatibility mode. - Fixed issue #356 - preserving *+html hack. - Fixed issue #354 - !important overriding in shorthands.	<u>2.2.15 / 2014-09-01</u> - Fixed issue #343 - too aggressive rgba/hsla minification. - Fixed issue #345 - URL rebasing for document relative ones. - Fixed issue #346 - overriding !important by !important. - Fixed issue #350 - edge cases in @import processing.	<u>2.2.14 / 2014-08-25</u> - Makes multival operations idempotent. - Fixed issue #339 - skips invalid properties. - Fixed issue #341 - ensure output is shorter than input.
161	162	163	164
168	167	166	165
<u>2.2.10 / 2014-07-27</u> - Improved performance of advanced mode validators. - Fixed issue #307 - background-color in multiple backgrounds. - Fixed issue #322 - adds background-size support. - Fixed issue #323 - stripping variable references.	<u>2.2.11 / 2014-07-28</u> Fixed issue #326 - background-size regression.	<u>2.2.12 / 2014-08-02</u> - Fixed issue with tokenizer removing first selector after an unknown @ rule. - Fixed issue #329 - font shorthands incorrectly processed. - Fixed issue #332 - background shorthand with colors. - Refixed issue #325 - invalid charset declarations.	<u>2.2.13 / 2014-08-12</u> Fixed issue #337 - handling component importance.
Fixed issue #325 - removing invalid @charset declarations.	<u>2.2.9 / 2014-07-23</u> - Adds background normalization according to W3C spec. - Fixed issue #316 - incorrect background processing.	<u>2.2.8 / 2014-07-14</u> - Fixed issue #313 - processing comment marks in URLs. - Fixed issue #315 - rgba/hsla -> transparent in gradients.	<u>2.2.7 / 2014-07-10</u> - Fixed issue #304 - merging multiple backgrounds. - Fixed issue #312 - merging with mixed repeat.
169	170	171	172
176	175	174	173
<u>2.2.3 / 2014-06-24</u> Fixed issue #302 - handling of outline-style: auto.	<u>2.2.4 / 2014-06-27</u> - Fixed issue #301 - proper border-radius processing. - Fixed issue #303 - correctly preserves viewport units.	<u>2.2.5 / 2014-06-29</u> - Adds removing extra spaces around / in border-radius. - Adds replacing same horizontal & vertical value in border-radius. - Fixed issue #305 - allows width keywords in border-width.	<u>2.2.6 / 2014-07-05</u> - Adds faster quote matching in Quotescanner. - Improves Quotescanner to handle comments correctly. - Fixed issue #308 - parsing comments in quoted URLs. - Fixed issue #311 - leading/trailing decimal points.

2.2.2 / 2014-06-18 Fixed issue #297 - box-shadow zeros minification. 177	2.2.1 / 2014-06-14 - Fixes new property optimizer for 'none' values. - Fixed issue #294 - space after rgba/hsla in IE<=11. 178	2.2.0 / 2014-06-11 - Adds a better algorithm for quotation marks' removal. - Adds a better non-adjacent optimizer compatible with the upcoming new property optimizer. - Adds minifying remote files directly from CLI. - Adds --rounding-precision to control rounding precision. 179	- Moves quotation matching into a QuoteScanner class. - Adds npm run browserify for creating embeddable version of clean-css. - Fixed list-style-* advanced processing. - Fixed issue #134 - merges properties into shorthand form. - Fixed issue #164 - removes default values if not needed. - Fixed issue #168 - adds better property merging algorithm. 180
2.1.8 / 2014-03-28 Fixed issue #267 - incorrect non-adjacent selector merging. 181	2.1.7 / 2014-03-24 Fixed issue #258 - wrong @import handling in EmptyRemoval. 182	2.1.6 / 2014-03-10 - Fixed issue #288 - adds smarter expression parsing. - Fixed issue #293 - handles escaped @ symbols in class names and IDs. 183	2.1.5 / 2014-03-07 - Fixed issue #247 - removes deprecated selectorMergeMode switch. - Refixed issue #250 - based on new quotation marks removal. - Fixed issue #257 - turns rgba/hsla to transparent if possible. - Fixed issue #265 - adds support for multiple input files. - Fixed issue #275 - handling transform properties. - Fixed issue #276 - corrects unicode handling. 184
2.1.4 / 2014-03-01 - Fixed issue #173 - merges same properties if grouped. - Fixed issue #184 - uses !important for optimization opportunities. - Fixed issue #190 - uses shorthand to override another shorthand. - Fixed issue #197 - adds borders merging by understandability. - Fixed issue #210 - adds temporary workaround for aggressive merging. - Fixed issue #246 - removes IE hacks when not in compatibility mode. 185	2.1.3 / 2014-02-26 Fixed issue #248 - incorrect merging for vendor selectors. 186	2.1.2 / 2014-02-25 Fixed issue #245 - incorrect handling of backslash IE hack. 187	2.1.1 / 2014-02-18 - Adds faster selectors processing in advanced optimizer. - Fixed issue #241 - incorrect handling of :not() selectors. 188
2.1.0 / 2014-02-13 - Adds an optional callback to minify method. - Deprecates --selectors-merge-mode / selectorMergeMode in favor to --compatibility / compatibility. - Fixes debug mode stats for stylesheets using @import statements. - Skips empty removal if advanced processing is enabled. 189	2.1.1 / 2014-02-13 Fixed issue #264 - @import statements inside comments. 190	2.1.0 / 2014-02-13 Fixed issue #255 - incorrect processing of a trailing -0. 191	2.1.0 / 2014-02-13 Fixed issue #255 - incorrect processing of a trailing -0. 192

- Fixed issue #85 - resolving protocol @imports. - Fixed issue #160 - re-runs optimizer until a clean pass. - Fixed issue #161 - improves tokenizer performance. - Fixed issue #163 - round pixels to 2nd decimal place. - Fixed issue #165 - extra space after trailing parenthesis. - Fixed issue #186 - strip unit from 0rem.	- Fixed issue #207 - bug in parsing protocol @imports. - Fixed issue #213 - faster rgb to hex transforms. - Fixed issue #215 - leading zeros in numerical values. - Fixed issue #217 - whitespace inside attribute selectors and URLs. - Fixed issue #218 - @import statements cleanup. - Fixed issue #220 - selector between comments.	- Fixed issue #223 - two-pass adjacent selectors merging. - Fixed issue #226 - don't minify border:none to border:0. - Fixed issue #229 - improved processing of fraction numbers. - Fixed issue #230 - better handling of zero values. - Fixed issue #235 - IE7 compatibility mode. - Fixed issue #236 - incorrect rebasing with nested imports.	2.0.8 / 2014-02-07 Fixed issue #232 - edge case in non-adjacent selectors merging.
193	194	195	196
200	199	198	197
Fixed issue #193 - HSL color space normalization. 2.0.4 / 2013-12-19	- Fixed issue #199 - keep line breaks with no advanced optimizations. - Fixed issue #203 - Buffer as a first argument to minify method. 2.0.5 / 2014-01-03	- Fixed issue #198 - process comments and @imports correctly. - Fixed issue #205 - freeze on broken @import declaration. 2.0.6 / 2014-01-04	Fixed issue #208 - don't swallow @page and @viewport. 2.0.7 / 2014-01-16
2.0.3 / 2013-12-18 - Fixed issue #191 - leading numbers in font/animation names. - Fixed issue #192 - many @imports inside a comment.	2.0.2 / 2013-11-18 Fixed issue #177 - process broken content correctly.	2.0.1 / 2013-11-14 Fixed issue #176 - hangs on undefined keyword.	2.0.0 / 2013-11-04 - Adds simplified and more advanced text escaping / restoring via EscapeStore class. - Adds simplified and much faster empty elements removal. - Adds missing @import processing to our benchmark (run via npm run bench). - Adds CSS tokenizer which will make it possible to optimize content by reordering and/or merging selectors.
201	202	203	204
208	207	206	205
Fixed issue #156 - @imports inside comments. 1.1.7 / 2013-10-28	- Fixed issue #145 - debug mode in library too. - Fixed issue #157 - gets rid of removeEmpty option. - Fixed issue #159 - escaped quotes inside content. - Fixed issue #162 - strip quotes from Base64 encoded URLs. - Fixed issue #166 - debug formatting in CLI - Fixed issue #167 - background:transparent minification.	- Adds property overriding so more coarse properties override more granular ones. - Adds reducing non-adjacent selectors. - Adds -skip-advanced/advanced switch to disable advanced optimizations. - Adds reducing non-adjacent selectors when overridden by more complex selectors. - Fixed issue #138 - makes CleanCSS interface OO. - Fixed issue #139 - consistent error & warning handling.	- Adds basic optimizer removing duplicate selectors from a list. - Adds merging duplicate properties within a single selector's body. - Adds merging adjacent selectors within a scope (single and multiple ones). - Changes behavior of --keep-line-breaks/keepBreaks option to keep breaks after trailing braces only. - Makes all multiple selectors ordered alphabetically (aids merging).

<u>1.1.6 / 2013-10-26</u> Fixed issue #155 - broken irregular CSS content.	<u>1.1.5 / 2013-10-24</u> Fixed issue #153 - keepSpecialComments 0/1 as a string.	<u>1.1.4 / 2013-10-23</u> Fixed issue #152 - adds an option to disable rebasing.	<u>1.1.3 / 2013-10-04</u> Fixed issue #150 - minifying background:none.
209	210	211	212
216	215	214	213
- Fixed issue #84 - support for @import with media queries. - Fixed issue #124 - raise error on broken imports. - Fixed issue #126 - proper CSS expressions handling. - Fixed issue #129 - rebasing imported URLs. - Fixed issue #130 - better code modularity. - Fixed issue #135 - require node.js 0.8+.	<u>1.1.0 / 2013-09-06</u> - Renamed lib's debug option to benchmark when doing per-minification benchmarking. - Added simplified comments processing & imports. - Fixed issue #43 - --debug switch for minification stats. - Fixed issue #65 - full color name / hex shortening.	<u>1.1.1 / 2013-09-07</u> Fixed issue #144 - skip URLs rebasing by default.	<u>1.1.2 / 2013-09-29</u> Fixed issue #149 - shorthand font property.
<u>1.0.12 / 2013-07-19</u> Fixed issue #121 - ability to skip @import processing.	<u>1.0.11 / 2013-07-08</u> Fixed issue #117 - line break escaping in comments.	<u>1.0.10 / 2013-06-13</u> Fixed issue #114 - comments in imported stylesheets.	<u>1.0.9 / 2013-06-11</u> Fixed issue #113 - @import in comments.
217	218	219	220
224	223	222	221
<u>1.0.5 / 2013-05-26</u> Fixed issue #107 - data URIs in imported stylesheets.	<u>1.0.6 / 2013-06-04</u> Fixed issue #110 - data URIs in URLs.	<u>1.0.7 / 2013-06-05</u> - Support for @import URLs starting with //. - By @petetak.	<u>1.0.8 / 2013-06-10</u> Fixed issue #112 - reducing box-shadow zeros.

1.0.4 / 2013-05-23 Rewrite relative URLs in imported stylesheets. By @bluej100. 225 232	1.0.3 / 2013-05-20 Support alternative @import syntax with file name not wrapped inside url() statement. By @bluej100. 226 231	1.0.2 / 2013-04-29 Fixed issue #97 - ---remove-empty & FontAwesome. 227 230	1.0.1 / 2013-04-08 Do not pick up bench and test while building npm package. By @sindresorhus. 228 229
0.10.1 / 2013-02-14 Fixed issue #66 - line breaks without extra spaces should be handled correctly. 225 232	0.10.2 / 2013-03-19 Fixed issue #79 - node.js 0.10.x compatibility. 226 231	1.0.0 / 2013-03-30 - Fixed issue #86 - broken @charset replacing. - Fixed issue #88 - removes space in important. - Fixed issue #92 - uppercase hex to short versions. 227 230	1.0.0 / 2013-03-30 - Fixed issue #2 - resolving @import rules. - Fixed issue #44 - examples in --help. - Fixed issue #46 - preserving special characters in URLs and attributes. - Fixed issue #80 - quotation in multi line strings. - Fixed issue #83 - HSL to hex color conversions. 228 229
0.10.0 / 2013-02-09 - Switched from optimist to commander for CLI processing. - Changed long options from --removeempty to --remove-empty and from --keeplinebreaks to --keep-line-breaks. - Fixed performance issue with replacing multiple @charset declarations and issue with line break after @charset when using keepLineBreaks option. By @rrjaime. 223 240	- Removed Makefile in favor to npm run commands (e.g. make check -> npm run check). - Fixed issue #47 - commandline issues on Windows. - Fixed issue #49 - remove empty selectors from media query. - Fixed issue #52 - strip fraction zeros if not needed. - Fixed issue #58 - remove colon where possible. 234 239	Fixed issue #59 - content property handling. 235 238	0.9.1 / 2012-12-19 Fixed issue #37 - converting white and other colors in class names (reported by @malgorithms). 236 237
0.8.3 / 2012-11-29 Fixed HSL/HSLA colors processing. 240 240	- Speed optimizations (~10% despite many new features). - Added JSHint validation rules via make check. 239 239	- Added font: normal and font: bold shortening the same way as font-weight is. - Refactored shorthand selectors and added border-radius, border-style and border-color shortening. - Added margin, padding and border-width shortening. - Added removing line break after commas. - Fixed removing whitespace inside media query definition. - Added removing line breaks after a comma, so all declarations are one-liners now. 238 239	0.9.0 / 2012-12-15 - Added stripping quotation from font names (if possible). - Added stripping quotation from @keyframes declaration, animation and animation-name property. - Added stripping quotations from attributes' value (e.g. [data-target='x']). - Added better hex->name and name->hex color shortening. 237 237

0.8.2 / 2012-10-31 - Fixed shortening hex colors and their relation to hashes in URLs. - Cleanup by @XhmikosR. 241	0.8.1 / 2012-10-28 Added better zeros processing for <code>rect(...)</code> syntax (clip property). 242	0.8.0 / 2012-10-21 - Added removing URLs quotation if possible. - Rewrote breaks processing. - Added <code>keepBreaks/-b</code> option to keep line breaks in the minimized file. - Reformatted lib/clean.js so it's easier to follow the rules. - Minimized test data is now minimized with line breaks so it's easier to compare the changes line by line. 243	0.7.0 / 2012-10-14 - Added stripping special comments to CLI (<code>--s0</code> and <code>--s1</code> options). - Added stripping special comments to programmatic interface (<code>keepSpecialComments</code> option). 244
0.4.1 / 2012-06-10 Fixed stateless mode where calling <code>CleanCSS#process</code> directly was giving errors (reported by @facelessuser). 248	0.4.2 / 2012-06-28 - Updated binary - <code>-v</code> option (version). - Updated binary to output help when no options given (but not in piped mode). - Added binary tests. 247	0.5.0 / 2012-08-02 - Made path to vows local. - Explicit <code>node.js 0.6</code> requirement. 246	0.6.0 / 2012-08-05 Full Windows support with tests (<code>./test.bat</code>). 245
0.4.0 / 2012-06-04 - Speed improvements up to 4x thanks to the rewrite of comments and CSS' content processing. - Stripping empty CSS tags is now optional (see bin/cleancss for details). - Improved debugging mode (see test/bench.js) - Added <code>make bench</code> for a one-pass benchmark. 249	0.3.3 / 2012-05-27 Fixed tests, package.json for development, and regex for removing empty declarations (thanks to @vvvo). 250	0.3.2 / 2012-01-17 Fixed output method under <code>node.js 0.6</code> which incorrectly tried to close <code>process.stdout</code>. 251	0.3.1 / 2011-12-16 Fixed cleaning up <code>0 0 0 0 0</code> expressions. 252
0.2.4 / 2011-05-25 - Fixed problem with expanding none to <code>0</code> in partial/full background and declarations. - Fixed including clean-css library from binary (global to local). 256	0.2.5 / 2011-11-27 - Fixed issue with cleaning up spaces inside <code>calc/-moz-calc</code> declarations (thanks to @cvean for reporting it). - Fixed converting <code>#f00</code> to red in borders and gradients. 255	0.2.6 / 2011-11-27 Fixed expanding + signs in <code>calc()</code> when mixed up with adjacent + selector. 254	0.3.0 / 2011-11-29 - Clean-css requires <code>node.js 0.4.0+</code> to run. - Removed <code>node.js 0.2.x</code> 'sys' package dependency (thanks to @jmalonzo for a patch). 253

0.2.3 / 2011-04-18 Fixed problem with optimizing IE filters. 257	0.2.2 / 2011-04-17 Fixed problem with space before color in border property. 258	0.2.1 / 2011-03-19 - Added stripping space before !important keyword. - Updated repository location and author information in package.json. 259	0.2.0 / 2011-03-02 - Added options parsing via optimist. - Changed code inclusion (thus the version bump). 260
264	263	262	261 - First version of clean-css library. - Implemented all basic CSS transformations. 0.1.0 / 2011-02-27
265	266	267	268
272	271	270	269
