

1.8.1 / 2017-09-12 perf: replace regular expression with substring 1	1.8.0 / 2017-02-18 - Use SHA1 instead of MD5 for ETag hashing - Improves performance for larger entities - Works with FIPS 140-2 OpenSSL configuration 2	1.7.0 / 2015-06-08 - Always include entity length in ETags for hash length extensions - Generate non-Stats ETags using MD5 only (no longer CRC32) - Improve stat performance by removing hashing - Remove base64 padding in ETags to shorten - Use MD5 instead of MD4 in weak ETags over 1KB 3	1.6.0 / 2015-05-10 - Improve support for JXcore - Remove requirement of atime in the stats object - Support “fake” stats objects in environments without fs 4
8 Use the (new and improved) crc for crc32 1.3.1 / 2014-09-14	7 - Support “fake” stats objects - Support Node.js 0.6 1.4.0 / 2014-09-21	9 - Improve string performance - Slightly improve speed for weak ETags over 1KB 1.5.0 / 2014-10-14	5 - deps: crc@3.2.1 - Minor fixes 1.5.1 / 2014-11-19
1.3.0 / 2014-08-29 - Default strings to strong ETags - Improve speed for weak ETags over 1KB 9	1.2.1 / 2014-08-29 Use the (much faster) buffer-crc32 for crc32 10	1.2.0 / 2014-08-24 Add support for file stat objects 11	1.1.0 / 2014-08-24 - Add fast-path for empty entity - Add weak ETag generation - Shrink size of generated ETags 12
16	15	14 Initial release 1.0.0 / 2014-05-18	13 Fix behavior of string containing Unicode 1.0.1 / 2014-08-24
