Release history

4.0.0 - 2018-04-01

Breaking changes

- Now requires node v4 or higher.

3.0.0 - 2017-06-30

Breaking changes

- `toml`, `coffee` and `cson` are no longer supported by default. Please see `options.engines` and the examples to learn how to add engines.

Added

- Support for excerpts.

- The returned object now has non-enumerable `matter` and `stringify` properties.

Changed

- Refactored engines (parsers), so that it's easier to add parsers and stringifiers.
- `options.parsers` was renamed to `options.engines`
