entities

Encode & decode HTML & XML entities with ease & speed.

How to...

...install entities

```
npm install entities
```

...use entities

```
const entities = require("entities");

//encoding
entities.escape("&#38;"); // "&amp;#38;"
entities.encodeXML("&#38;"); // "&amp;#38;"
entities.encodeHTML("&#38;"); // "&amp;amp;&amp;num;38&amp;semi;"
```

```
//decoding
entities.decodeXML("asdf &amp; &#xFF; &#xFC; &apos;"); // "asdf & ÿ ü '"
entities.decodeHTML("asdf &amp; &yuml; &uuml; &apos;"); // "asdf & ÿ ü '"
```

Performance

This is how `entities` compares to other libraries on a very basic benchmark (see

bit slower if there wasn't any competition. Right now `entities` is on top, but we'll see how long that lasts!

Security contact information

To report a security vulnerability, please use the Tidelift security contact. Tidelift will coordinate the fix and disclosure.

`entities` for enterprise

Available as part of the Tidelift Subscription

The maintainers of `entities` and thousands of other packages are working with Tidelift to deliver commercial support and maintenance for the open source dependencies you use to build your applications. Save time, reduce risk, and improve code health, while paying the maintainers of the exact dependencies you use. Learn more.

Acknowledgements

This libary wouldn't be possible without the work of these individuals. Thanks to

- @mathiasbynens for his explanations about character encodings, and his library `he`, which was one of the inspirations for `entities`
- @inikulin for his work on optimized tries for decoding HTML entities for the `parse5` project
- @mdevils for taking on the challenge of producing a quick entity library with his `html-entities` library. `entities` would be quite a
