

3.9.1 - 2017-07-08 Fixed - Ensure stack is present for custom errors in node 7.+, #351. 3.9.0 - 2017-07-08 Added - Add condenseFlow option (to create pretty URL query params), #346.	Fixed - Support array return from safeLoadAll/loadAll, #350. 3.8.4 - 2017-05-08 Fixed - Dumper: prevent space after dash for arrays that wrap, #343.	3.8.3 - 2017-04-05 Fixed - Should not allow numbers to begin and end with underscore, #335. 3.8.2 - 2017-03-02 Fixed - Fix !!float 123 (integers) parse, #333.	- Don't leading zeros in floats (except 0, 0.xxx). - Allow positive exponent without sign in floats. 3.8.1 - 2017-02-07 Changed - Maintenance: update browserified build.
17 24 Fixed - Date parse fix: don't allow dates with on digit in month and day, #268. 3.5.5 - 2016-03-17 Fixed - Loader: fix leading/trailing newlines in block scalars, @aepsilon.	18 23 Fixed - Dumper rewrite, fix multiple bugs with trailing \n. Big thanks to @aepsilon! 3.6.0 - 2016-04-16 - Fix output cut on a pipe, #286. Fixed 3.6.1 - 2016-05-11	19 22 Fixed - Fix parsing of quotes followed by newlines (#304, thanks to @dplepage). Added - Support polymorphism for tags (#300, thanks to @monken). 3.7.0 - 2016-11-12	20 21 Fixed Fix reported position for duplicated mapping key errors. Now points to block start instead of block end. (#243, thanks to @shockey). 3.8.0 - 2017-02-07
3.5.4 - 2016-03-09 Added - noCompatMode for dumper, to disable quoting YAML 1.1 values. 3.5.3 - 2016-02-11 Changed - Maintenance release.	3.5.2 - 2016-01-11 Changed - Maintenance: missed comma in bower config. 3.5.1 - 2016-01-11 Changed - Removed inherit dependency, #239.	- Better browserify workaround for esprima load. - Demo rewrite. 3.5.0 - 2016-01-10 Fixed - Dumper. Fold strings only, #217. - Dumper. norefs option, to clone linked objects, #229. - Loader. Throw a warning for duplicate keys, #166.	- Improved browserify support (mark esprima & Buffer excluded). 3.4.6 - 2015-11-26 Changed - Use standalone inherit to keep browserified files clear.
25 32 Changed - Don't throw on warnings anymore. Use onWarning option to catch. - Throw error on unknown tags (was warning before). - Reworked internals of error class. 3.4.0 - 2015-08-23	26 31 Fixed - Fixed stacktrace handling in generated errors, for browsers (FF/IE). 3.4.1 - 2015-09-05 - Fixed serialization of duplicated entries in sequences, #205. Thanks to @voegelisgesang. Fixed 3.4.2 - 2015-09-09	27 30 Changed - Maintenance release - deps bump (esprima, argparse). 3.4.3 - 2015-10-10 - Allow non-printable characters inside quoted scalars, #192.	28 29 Fixed - Fixed floats dump (missed dot for scientific format), #220. 3.4.4 - 2015-11-21 - Added lineWidth option to dumper. 3.4.5 - 2015-11-23

Fixed - Fixed multiline keys dump, #197. Thanks to @tcr. - Fixed heading line breaks in some scalars (regression). 3.3.1 - 2015-05-13 Added - Added .sortKeys dumper option, thanks to @rjmunro.	Fixed - Fixed astral characters support, #191. 3.3.0 - 2015-04-26 Changed - Significantly improved long strings formatting in dumper, thanks to @isaacs. - Strip BOM if exists.	3.2.7 - 2015-02-19 Changed - Maintenance release. - Updated dependencies. - HISTORY.md -> CHANGELOG.md	3.2.6 - 2015-02-07 Fixed - Fixed encoding of UTF-16 surrogate pairs. (e.g. "001F431" CAT FACE). - Fixed demo dates dump (#113, thanks to @Hypercubed).
33 40 - Added input piping support to CLI. Added 3.2.0 - 2014-08-24 - Nothing new. Just fix npm publish error. Fixed 3.2.1 - 2014-08-24	34 39 - Implemented dumping of objects with circular and cross references. Fixed 3.2.3 - 2014-11-08 - Fixed resolving of !null tag on an empty node. Fixed 3.2.4 - 2014-12-19	35 38 - Implemented dumping of objects with circular and cross references. Fixed 3.2.3 - 2014-11-08 - Fixed resolving of !null tag on an empty node. Fixed 3.2.4 - 2014-12-19	36 37 - Fixed resolving of all built-in types on empty nodes. - Fixed invalid warning on empty lines within quoted scalars and flow collections. - Fixed bug: Tag on an empty node didn't resolve in some cases. Fixed 3.2.5 - 2014-12-28
Fixed - Fixed typo, that could cause hand on initial indent (#139). 3.1.0 - 2014-07-07 Changed 1.5x-2x speed boost. - Removed deprecated require('xxx.yml') support. - Significant code cleanup and refactoring.	Fixed - Internal API changed. If you used custom types - see updated examples. Others are not affected. - Even if the input string has no trailing line break character, it will be parsed as if it has one. - Added benchmark scripts. - Moved bower files to /dist folder - Bugfixes.	3.0.2 - 2014-02-27 Fixed - Fixed bug: "constructor" string parsed as null. 3.0.1 - 2013-12-22 Fixed - Fixed parsing of literal scalars. (issue #108)	- Prevented adding unnecessary spaces in object dumps. (issue #68) - Fixed dumping of objects with very long (> 1024 in length) keys. 3.0.0 - 2013-12-16 Changed - Refactored code. Changed API for custom types. - Removed output colors in CLI, dump json by default.
41 48 - Added standard YAML schemas: Failsafe (FAISAFE_SCHEMA), JSON (JSON_SCHEMA) and Core (CORE_SCHEMA). - Add skipInvalid dumper option. Added 2.1.0 - 2013-06-05	42 47 - Dumper now respects deprecated booleans syntax from YAML 1.0/1.1 - Fixed reader bug in JSON-like sequences/mappings. Fixed 2.1.1 - 2013-10-02	43 46 - Fix wrong loading of empty block scalars. Fixed 2.1.2 - 2013-10-07 - Fix unwanted line breaks in folded scalars.	44 45 - Removed big dependencies from browser version (esprima, buffer). Load esprima manually, if ijs/function needed. ijsbin now returns Array in browser. - AMD support. - Don't quote dumped strings because of - & ? (if not first char). - Deprecated loading yaml files via require(), as not recommended behaviour for node.

49 Changed - Rename DEFAULT_SCHEMA to DEFAULT_FULL_SCHEMA and SAFE_SCHEMA to DEFAULT_SAFE_SCHEMA. - Use safeLoad for require extension. Fixed - Bug fix: export NIL constant from the public interface.	50 2.0.5 - 2013-04-26 Security - Close security issue in !!js/function constructor. Big thanks to @nealpoole for security audit. 2.0.4 - 2013-04-08 Changed - Updated .npmignore to reduce package size	51 2.0.3 - 2013-02-26 Fixed - Fixed dumping of empty arrays ans objects. ([] and {} instead of null) 2.0.2 - 2013-02-15 Fixed - Fixed input validation: tabs are printable characters.	52 2.0.1 - 2013-02-09 Fixed - Fixed error, when options not passed to function cass 2.0.0 - 2013-02-09 Changed - Full rewrite. New architecture. Fast one-stage parsing.
56 1.0.0 - 2012-07-01 Changed - y, yes, n, no, on, off are not converted to Booleans anymore. Fixes #42. - require(filename) now returns a single document and throws an Error if file contains more than one document. - CLI was merged back from js-yaml.bin	55 1.0.1 - 2012-07-07 Fixed - Fixes TypeError: 'undefined' is not an object under Safari. Thanks Phuong. - Fix timestamps incorrectly parsed in local time. Thanks @caolan. Closes #46.	54 1.0.2 - 2012-08-02 Fixed - Pull out hand-written shims. Use ES5-Shims for old browsers support. See #44. - Fix timestamps incorrectly parsed in local time when no time part specified.	53 1.0.3 - 2012-11-05 Fixed - Changed custom types API. - Added YAML dumper. - Fixed utf-8 files loading.
57 0.3.7 - 2012-02-28 Fixed - Fix export of addConstructor(). Closes #39. 0.3.6 - 2012-02-22 Changed - Removed AMD parts - too buggy to use. Need help to rewrite from scratch	58 0.3.5 - 2012-01-10 Fixed - Removed YUI compressor warning (renamed double variable). Closes #40. Fixed - Workagound for .npmignore fuckup under windows. Thanks to airportyh.	59 0.3.4 - 2011-12-24 Fixed - Fixes str[] for oldIEs support. - Adds better has change support for browserified demo. - improves compact output of Error. Closes #33.	60 0.3.3 - 2011-12-20 Added - adds compact stringification of Errors. Changed - jsyaml executable moved to separate module.
64 0.3.0 - 2011-11-09 Added - Fixed month parse in dates. Closes #19. Added - Added browserified version. Closes #13. - Added live demo of browserified version. - Ported some of the PyYAML tests. See #14. Fixed - Removed JS.Class dependency. Closes #3.	63 0.3.1 - 2011-11-18 Changed - Added !!js/regexp and !!js/undefined types. Partially solves #12. Changed - Wrapped browserified js-yaml into closure. Fixed - Fixed the resolvemnent of non-specific tags. Closes #17. - Fixed !isset mapping.	62 0.3.1 - 2011-11-18 Added - Fixed bug in Safari. Closes #28. - Fixes bug in Opers. Closes #29. - Improves browser support. Closes #20. Added - Added AMD support for browserified version. - Added permalinks for online demo YAML snippets. Now we have YPaste service, lol.	61 0.3.2 - 2011-12-16 Added - Added jsyaml executable. - Added !!js/function support. Closes #12. Fixed - Fixes ug with block style scalars. Closes #26. - All sources are passing JSLint now.

- Fixed timestamp bug when fraction was given. 0.2.2 - 2011-11-06 Fixed - Fixed crash on docs without —. Closes #8. - Fixed multiline string parse - Fixed tests/comments for using array as key	0.2.1 - 2011-11-02 Fixed - Fixed short file read (<4k). Closes #9. 0.2.0 - 2011-11-02 Changed - First public release
