

Changelog 1	2.x 2.7.7 - Fix stale build 2.7.6 - Fix typescript type definition - handle empty optgroups 2	2.7.5 - Fix issue where empty optgroup in select prevents proper diffing 2.7.4 - Fix incorrect index references when returning a cloned tree from onBeforeElUpdated 3	2.7.3 - Allow returning a new fromEl tree from onBeforeElUpdated to be used morph for that branch 2.7.2 - Fix morphing duplicate ids of incompatible tags 4
8 - Enhancement: Fix id key removal from tree when the element with key is inside a 2.5.4 - Template support for creating element from string PR #159 2.5.5 - fixed the string with space trouble PR #161 2.5.6	7 - Chore: Alternate refactor to #155 - Move isSameNode check PR #156 - Use attribute name with the prefix in XMLNS namespace PR #133 2.5.7 - Minor improvements PR #164 2.5.8 - Faster attrs merge PR #165 2.5.9	6 - Fix merge attrs with multiple properties PR #175 2.5.11 - Multiple forms duplication PR #174 2.5.10 - Pr/167 - Allow document fragment patching PR #168 2.5.12	5 - Pass toEl as second argument to skipFromChildren callback - Add new addChild and skipFromChildren callbacks to allow customization of how new children are added to a parent as well as preserving the from tree when indexing changes for diffing. 2.7.0
document fragment node (ex: shadow dom) PR #119 - Minor: small refactor to morphEl to own function PR #149 - selectNode for range b/c documentElement not avail in Safari commit - clarify getNodeKey docs PR #151 2.5.3 - Minor: update deps PR #145 - Minor: Minor comments and very very minor refactors PR #143 6	2.5.2 - New dist for 2.5.1. My bad! 2.5.1 - Bugfix: Fix bug where wrong select option would get selected. PR #117 2.5.0 - Enhancement: Publish es6 format as morphdom-esm.js PR #141 10	- Enhancement: Start removing old browser support code paths PR #140 2.4.0 - Enhancement: Rollup 1.0 PR #139 - Enhancement: Add Typescript declaration file PR #138 11	2.3.x 2.3.1 - Bug: Fixed losing cursor position in Edge (PR #100 by @zastavniksiy) 2.3.0 - Changes to improve code maintainability. Single file is now split out into multiple 12
16 Fixed #85 - Siblings not diffed/patched after isSameNode() returns true (PR #86 by @AutoSponge) 2.1.2 2.1.3 2.1.x	15 Allow toNode.assignAttributes full control 2.2.0	14 - IE-specific bug: fix <textarea> with placeholder attribute on IE (PR #87 by @ahdinosaur) - Fixed #92 - morphdom fails to discard all removed child nodes when first child element is keyed - Docs: fixed docs for onBeforeNodeAdded (function should return a node) (PR #91 by @MellieB) 2.2.1	13 Changes to ensure that selectedIndex is updated correctly in all browsers (PR #94 by @aknuds1) 2.2.2 2.2.x modules and foliup is used to build the distribution files.

2.1.1 - Fixed #84 - unexpected repaint of <select> tag 2.1.0 - Added simple mechanism to support using cached nodes (Pull Request #81 by @AutoSponge) - Fixes: Issue #77 - Memoized elements are removed & added anyway 17	- Added support for diffing a real DOM tree with a virtual DOM tree. See: ./docs/virtual-dom.md 2.0.x 2.0.2 - Fixed #78 - Elements under onBeforeElChildrenUpdated element removed if they have id set 18	2.0.1 - Small optimization and more tests 2.0.0 - Fixed #47 - Detect and handle reorder of siblings - onNodeAdded is now called for all on child nodes and not just the root node (closes PR #57) 19	- Simplified code and reduced overall code size - NOTE: Performance is about the same or slightly better than the previous version of morphdom based on benchmarks - Added examples: ./examples/ Breaking changes - onNodeAdded is now called for all on child nodes (not just the root node) 20
24 - Fixes #63 - Do attr lookup on localName if available 1.4.2 1.4.3 - Fixes #66 by treating comment nodes identically to text nodes (PR #67 by @cfrincane)	23 - Fixes #72 - Compare tag name when matching els by ID 1.4.4 1.4.5 - onNodeDiscarded is now correctly called when tag name mismatch for keyed el	22 Fixes #71 - form elements lose class when removing name attribute in MSIE 8-11 and MS Edge (PR #73 by @karfcz) 1.4.x 1.x	21 - Removed options: - onBeforeMorphElChildren (use onBeforeElChildrenUpdated instead) - onBeforeMorphEl (use onBeforeElUpdated instead)
1.4.1 - Use hard coded constants for node types for improved browser compatibility 1.4.0 - Make attributes and elements namespace-aware (@shawnbob) 25	1.3.x 1.3.1 - Upgraded to lasso@^2 - Fixed tests 1.3.0 - Support full page html diff (@DylanPiercey) 26	1.2.x 1.2.0 - Improve node lifecycle options (@callum) 1.1.x 1.1.4 - Checking in dist/ files into the git repo - Deleted .cache/ from npm package 27	1.1.3 - Added a minified UMD distribution file 1.1.2 - Minor internal changes 1.1.1 - Updated package.json 28
32	31 Fixes #19 - Textarea problems 1.0.1	30 - Added getNodeId option - Pull Request by Rilm - Fixes #21 - Caret position should not change if value did not change 1.0.2 1.0.3	29 - Fixes #30 - Not all keyed elements are matched up correctly in some cases. Walk target DOM els that are moved over to match all keyed els. 1.0.4 1.0.x - Fixes #32 - Support for IE7+
