

Please upgrade Node	Build Status	:information_desk_person: show a message to your users to upgrade Node instead of a stacktrace It's common for new Node users to miss or not understand engines warning when installing a CLI. This package displays a beginner-friendly message if their Node version is below the one expected.	<pre>\$ node -v 0.12 \$ modern-cli modern- cli requires at least version 6 of Node, please upgrade</pre> Support If you like this project, you can support me on GitHub Sponsors
<pre>return 'Ops this program require Node ' + requiredVersion } } Important: to keep message function compatible with older versions of Node, avoid using ES6 features like => or string interpolation.</pre>	<pre>Important: >= is the only operator supported by please-upgrade-node (e.g. >=6, >=6.0, >=6.0.0). Options You can set custom exitCode and message function if needed pleaseUpgradeNode(pkg, { exitCode: 0, // Default: 1 message: function(requiredVersion) {</pre>	<pre>// ... Set in your package.json the required Node version { "engines": { "node": ">=6" } } requiring any other modules (pkg) // <- Must run BEFORE (require('please-upgrade-node') const pkg = require('./package.json') # /usr/bin/env node</pre>	Usage <pre>npm install please-upgrade-node Add please-upgrade-node at the top of your CLI</pre>
