

build slash unknown	Convert Windows backslash paths to slash paths: foo\\bar → foo/bar Forward-slash paths can be used in Windows as long as they're not extended- length paths and don't contain any non-ascii characters. This was created since the path methods in Node.js outputs \\ paths on Windows.	Install \$ npm install slash Usage const path = require('path'); const slash = require('slash'); const string = path.join('foo', 'bar'); // Unix => foo/bar // Windows => foo\\bar	slash(string); // Unix => foo/bar // Windows => foo/bar API slash(path) Type: string Accepts a Windows backslash path and returns a path with forward slashes.
