

Change Log 0.5.6 - Fix for regression when people were using numbers as names in source maps. See #236. 0.5.5 - Fix “regression” of unsupported, implementation behavior that half the world 1	happens to have come to depend on. See #235. - Fix regression involving function hoisting in SpiderMonkey. See #233. 0.5.4 - Large performance improvements to source-map serialization. See #228 and #229. 2	0.5.3 - Do not include unnecessary distribution files. See commit ef7006f8d1647e0a83fdc60f04f5a7ca54886f86. 0.5.2 - Include browser distributions of the library in package.json’s files. See issue #212. 3	0.5.1 - Fix latent bugs in IndexedSourceMapConsumer.prototype._parseMappings. See ff05274becc9e6e1295ed60f3ea090d31d843379. 0.5.0 - Node 0.8 is no longer supported. - Use webpack instead of dryice for bundling. - Big speedups serializing source maps. See pull request #203. 4
8 0.4.2 - Add an .npmignore file so that the benchmarks aren’t pulled down by dependent projects. Issue #169. - Add an optional column argument to SourceMapConsumer.prototype.allGeneratedPositions and better handle lines with no mappings. Issues #172 and #173.	7 0.4.3 - Fix a bug in SourceMapConsumer.prototype.allGeneratedPositions and fuzzy searching in the presence of a column option. See issue #177. - Fix a bug with joining a source and its source root when the source is above the root. See issue #182. - Add the SourceMapConsumer.prototype.allGeneratedPositions method to determine when all sources’ contents are inlined into the source map. See issue #190.	6 0.4.4 - Fix an issue with where SourceMapGenerator would mistakenly consider different mappings as duplicates of each other and avoid generating them. See issue #192. - A very large number of performance improvements, particularly when parsing source maps. Collectively about 75% of time shaved off of the source map parsing benchmark!	5 0.4.4 - Fix a bug with SourceMapConsumer.prototype.sourceContentFor and sources that explicitly start with the source root. See issue #199. - Fix an issue where using a SourceMapGenerator after having created a SourceMapConsumer from it via SourceMapConsumer.fromSourceMap failed. See issue #191.
0.4.1 - Fix accidentally defining a global variable. #170. 0.4.0 - The default direction for fuzzy searching was changed back to its original direction. See #164. - There is now a bias option you can supply to SourceMapConsumer to control the fuzzy searching direction. See #167. 9	0.3.0 - About an 8% speed up in parsing source maps. See #159. - Added a benchmark for parsing and generating source maps. 0.3.0 - Change the default direction that searching for positions fuzzes when there is not an exact match. See #154. - Support for environments using json2.js for JSON serialization. See #156. 10	0.2.0 - Support for consuming “indexed” source maps which do not have any remote sections. See pull request #127. This introduces a minor backwards incompatibility if you are monkey patching SourceMapConsumer.prototype methods. 0.1.43 - Performance improvements for SourceMapGenerator and SourceNode. See 11	0.1.42 Fix an issue where SourceNodes from different versions of the source-map library couldn’t be used in conjunction with each other. See issue #142. issue #148 for some discussion and issues #150, #151, and #152 for implementations. 12
16 0.1.36 - Allow the names mapping property to be an empty string. Issue #121. - A third optional parameter was added to SourceNode.fromStringWithSourceMap to specify a path that relative sources in the second parameter should be relative to. Issue #105. 0.1.35	15 0.1.37 - Fix a bug where if the source root was an empty string, relative source paths would turn into absolute source paths. Issue #124. - Fix a bug where finding relative paths from an empty path were creating absolute paths. See issue #129. 0.1.38	14 0.1.40 - Performance improvements for parsing source maps in SourceMapConsumer. - Fix a bug where setting a source’s contents to null before any source content had been set before threw a TypeError. See issue #131. 0.1.39	13 0.1.41 - Fix a bug with getting the source content of relative sources with a “./” prefix. See issue #145 and Bug 1090768. - Add the SourceMapConsumer.prototype.computeColumnSpans method to compute the column span of each mapping. - Add the SourceMapConsumer.prototype.allGeneratedPositions method to find all generated positions 13

- If no file property is given to a <code>SourceMapGenerator</code>, then the resulting source map will no longer have a <code>null</code> file property. The property will simply not exist. Issue #104. - Fixed a bug where consecutive newlines were ignored in <code>SourceNodes</code>. Issue #116. 0.1.34 - Make <code>SourceNode</code> work with windows style (“\”) newlines. Issue #103.	- Fix bug involving source contents and the <code>SourceMapGenerator.prototype.applySourceMap</code>. Issue #100. 0.1.33 - Fix some edge cases surrounding path joining and URL resolution. - Add a third parameter for relative path to <code>SourceMapGenerator.prototype.applySourceMap</code>. - Fix issues with mappings and EOLs.	0.1.32 - Fixed a bug where <code>SourceMapConsumer</code> couldn’t handle negative relative columns (issue 92). - Fixed test runner to actually report number of failed tests as its process exit code. - Fixed a typo when reporting bad mappings (issue 87).	0.1.31 - Delay parsing the mappings in <code>SourceMapConsumer</code> until queried for a source location. - Support Sass source maps (which at the time of writing deviate from the spec in small ways) in <code>SourceMapConsumer</code>. 0.1.30 - Do not join source root with a source, when the source is a data URI.
17 24 - Fix issue with absolute paths and <code>sourcesContent</code>, github issue 64. 0.1.23 - Fix issue with absolute paths and <code>file: // URIs</code>. See https://bugzilla.mozilla.org/show_bug.cgi?id=885597 0.1.24	81 23 - Make compatible with browserify 0.1.25 - Fix <code>SourceNode.fromStringWithSourceMap</code> for empty maps. Fixes github issue 70. 0.1.26 - Don’t throw an error when the <code>file</code> property is missing in <code>SourceMapConsumer</code>, we don’t use it anyway. 0.1.27	69 22 - Allow duplicate entries in the names and <code>sources</code> arrays of source maps (usually from TypeScript) we are parsing. Fixes github issue 72. - Skip duplicate mappings when creating source maps from <code>SourceNode</code>; github issue 75. 0.1.28 0.1.29	20 21 - Extend the test runner to allow running single specific test files at a time. - Performance improvements in <code>SourceNode.prototype.walk</code> and <code>SourceMapConsumer.prototype.eachMapping</code>. - Source map browser builds will now work inside Workers. - Better error messages when attempting to add an invalid mapping to a <code>SourceMapGenerator</code>.
0.1.22 - Ignore duplicate mappings in <code>SourceMapGenerator</code>. Fixes github issue 21. 0.1.21 - Fixed handling of sources that start with a slash so that they are relative to the source root’s host.	0.1.20 - Fixed github issue #43: absolute URLs aren’t joined with the source root anymore. 0.1.19 0.1.18 - Using Travis CI to run tests. - Fixed a bug in the handling of <code>sourceRoot</code>.	0.1.17 - Added <code>SourceNode.fromStringWithSourceMap</code>. 0.1.16 - Added missing documentation. - Fixed the generating of empty mappings in <code>SourceNode</code>.	0.1.15 - Added <code>SourceMapGenerator.applySourceMap</code>. 0.1.14 - The <code>sourceRoot</code> is now handled consistently. 0.1.13 - Added <code>SourceMapGenerator.fromSourceMap</code>.
25 32	26 31	27 30	28 29 - Added <code>sourceContent</code> support to the customer and generator. 0.1.10 - Added name support to <code>SourceNode</code>. 0.1.11 <code>SourceNode</code> now generates empty mappings too. 0.1.12
